*** Special categories of cited documents :**

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *&* document member of the same patent family

(54) Title: WAVEGUIDE POLARISATION ROTATOR

(57) Abstract: A waveguide rotator is described for use with an LNB for use with a dual polarisation waveguide probe system in which the waveguide has an internal structure which protrudes into the waveguide such that a first orthogonal component of the incident polarised signal propagates to the end of the waveguide and is reflected therefrom and the second orthogonally polarised component is cut-off by the protruding structure which narrows the waveguide, at a distance from a short circuit at the end of the waveguide, and is reflected substantially at the cut-off point. At some predetermined distance from the reflecting means and the cut-off point, the first component and the second component are recombined such that the polarisation of the recombined structure is rotated 90° from the incident polarisation.

Facsimile No.:

0141 221 7739

Teleprinter No.:

☐ Address for correspondence: Mark this check-box where no agent or common representative is/has been appointed and the space above is used instead to indicate a special address to which correspondence should be sent.

Box No. IV BASIS FOR INTERNATIONAL PRELIMINARY EXAMINATION

Statement concerning amendments:*

1. The applicant wishes the international preliminary examination to start on the basis of:

☒ the international application as originally filed

the description ☐ as originally filed
☐ as amended under Article 34

the claims ☐ as originally filed
☐ as amended under Article 19 (together with any accompanying statement)
☐ as amended under Article 34

the drawings ☐ as originally filed
☐ as amended under Article 34

2. ☐ The applicant wishes any amendment to the claims under Article 19 to be considered as reversed.

3. ☐ The applicant wishes the start of the international preliminary examination to be postponed until the expiration of 20 months from the priority date unless the International Preliminary Examining Authority receives a copy of any amendments made under Article 19 or a notice from the applicant that he does not wish to make such amendments (Rule 69.1(d)). (This check-box may be marked only where the time limit under Article 19 has not yet expired.)

* Where no check-box is marked, international preliminary examination will start on the basis of the international application as originally filed or, where a copy of amendments to the claims under Article 19 and/or amendments of the international application under Article 34 are received by the International Preliminary Examining Authority before it has begun to draw up a written opinion or the international preliminary examination report, as so amended.

Language for the purposes of international preliminary examination:

☐ which is the language in which the international application was filed.
☐ which is the language of a translation furnished for the purposes of international search.
☐ which is the language of publication of the international application.
☐ which is the language of the translation (to be) furnished for the purposes of international preliminary examination.

Box No. V ELECTION OF STATES

The applicant hereby elects all eligible States (that is, all States which have been designated and which are bound by Chapter II of the PCT)

excluding the following States which the applicant wishes not to elect:

Sheet No. 3.

International application No.
PCT/GB00/01855

Box No. VI CHECK LIST

The demand is accompanied by the following elements, in the language referred to in Box No. IV, for the purposes of international preliminary examination:

- | | |
|--|--------|
| 1. translation of international application | sheets |
| 2. amendments under Article 34 | sheets |
| 3. copy (or, where required, translation) of amendments under Article 19 | sheets |
| 4. copy (or, where required, translation) of statement under Article 19 | sheets |
| 5. letter | sheets |
| 6. other (specify) | sheets |

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/GB00/01855

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, pages:

1-16 as originally filed

Claims, No.:

1-11 as originally filed

Drawings, No.:

1-19 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/GB00/01855

☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes:	Claims	3,6
	No:	Claims	1,2,4,5,7-11
Inventive step (IS)	Yes:	Claims	
	No:	Claims	1-11
Industrial applicability (IA)	Yes:	Claims	1-11
	No:	Claims	

2. Citations and explanations
see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:
see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:
see separate sheet

EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB00/01855

1. Reference is made to the following documents:

- D1: WO 96 28857 A (CAMBRIDGE INDUSTRIES LIMITED) 19 September 1996 (1996-09-19)
D2: PATENT ABSTRACTS OF JAPAN vol. 14, no. 175, 6 April 1990 (1990-04-06) -& JP 02 029001 A (NEC CORP), 31 January 1990 (1990-01-31)

Re Item V

2. Document D1 is regarded as being the prior art closest to the subject-matter of claim 1, and discloses all features set out in claim 1 (the references in parentheses applying to this document):
- a waveguide rotator 30 in a dual polarisation waveguide probe system for receiving at least two signals which are orthogonally polarised, said system having a waveguide 14 (see page 6 and 7; figure 1),
 - lines 4-20 of claim 1 of the application correspond almost literally to the first four paragraphs of claim 1 of D1,
 - said waveguide 14 having signal rotator means 30 disposed in said waveguide downstream of said second probe means 24 and having a protruding surface 34a extending from an interior surface of said waveguide partly across said waveguide towards a short circuit 32 disposed at an end of said waveguide (see page 6 and 7; figure 1),
 - said signal rotator means 30 being dimensioned and proportioned such that a first incident polarisation component V20 of said second polarisation signal propagates to the short circuit at the end of the waveguide and is reflected therefrom (see page 8, lines 20-21 and figure 2)
 - and a second incident polarisation component Vpra is cut-off by said protruding surface 34a,b before reaching the short circuit, and is reflected substantially by said protruding surface 34a,b at a frequency dependent cut-off point 34a,b (see page 8, lines 23-28: depending on the frequency the first 34a or the second step 34b corresponds to $\lambda/4$)
 - whereby said reflected first and second components recombine within said waveguide such that the polarisation of the reflected signal is rotated by 90° from the incident polarisation such that the reflected polarised signal is in said

longitudinal plane for detection by said second probe means 24 (see page 8, lines 30-34; figures 1 and 2).

Therefore the subject-matter of claim 1 is not new contrary to the requirement of Article 33(2) PCT.

3. The subject-matter of claim 11 is not new as well, since its additional features compared to claim 1 are disclosed in D1:
 - a low-noise block (page 6 , line 18),
 - a feed horn 18 (see page 6, line 22),
 - a printed circuit board 10, from which the cable 12 is led (see page 6, line 24), and an associated printed circuit support are (partly implicitly) disclosed (see also figure 1).
4. Claim 10 when compared with claim 1 merely brings in the additional feature 'increasing the wavelength of a second component of said polarised signal by decreasing the width of said waveguide by said protrusion'. In D1 the width of the waveguide is also decreased by the protrusion 30 (more than bisected). Consequently, the same effect as described in the present application, namely an increase of the wavelength of the second component, must also be present in D1. Therefore, the subject-matter of claim 10, too, is not new.
5. Dependent claims 2-9 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty or inventive step, the reasons being as follows:
 - The subject-matter of claims 2, 4, 5, 7-9 is not new, since it is disclosed in D1.
 - The subject-matter of claims 3 and 6 does not involve an inventive step, since their additional features are trivial having regard to D1 and D2.

Re Item VII

6. The independent claims are not in the two-part form as required by Rule 6.3(b) PCT.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB00/01855

7. The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).

Re Item VIII

8. 'For use' in claim 1 implies that the dual polarisation waveguide probe system is not part of the waveguide rotator and that the items specified in lines 2 to 20 of the claim are in fact outside the scope thereof. In this respect claim 1 does not comply with the prescriptions as to conciseness and clarity of Article 6 PCT.
- For the following reasons, too, claim 1 is not clear:
- The definition of the longitudinal plane (line 10) is unclear, since a plane cannot be defined by a probe, which is merely a line.
- In line 15 reference is made to 'said probe means', whereas the claim does not contain any corresponding antecedent.
- In lines 18- 20 it is said 'second probe means ... extending ... in said longitudinal plane'. Thereby, it is unclear, whether the second probe means intersects said longitudinal plane in a certain angle or it is lying in the longitudinal plane.
- The word 'and' in line 31 renders the claim unclear, since it does not make sense in this context.
- In line 31 allusion is made to the fact that a second polarisation component is 'cut-off' by a protruding surface. This seems to make no technical sense in the context of claim 1.
- In line 34 reference is made to 'said first component', whereas the claim does not contain any corresponding antecedent.
9. In claim 2 'a wedge-shaped protrusion' is defined. As a result, it is not clear, whether 'the protruding surface' of claim 1 is the surface of this 'wedge-shaped protrusion' or a second protrusion is added.
10. In claims 5 to 7, reference is made to 'the wedge' or 'the wedge shaped protrusion', whereas claim 1 does not contain any corresponding antecedent.
11. In claim 10, line 18, reference is made to 'the incident signal', whereas the claim does not contain any corresponding antecedent.

International application No. PCT/GB00/01855

On page 20, line 5, reference is made to 'the incident signal', whereas the claim does not contain any corresponding antecedent.

INTERNATIONAL COOPERATION TREATY

PCT

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference RSN/P10676PC	FOR FURTHER ACTION see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.	
International application No. PCT/GB 00/ 01855	International filing date (day/month/year) 17/05/2000	(Earliest) Priority Date (day/month/year) 17/05/1999
Applicant CAMBRIDGE INDUSTRIES LIMITED		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 4 sheets.

It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

- a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

- b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing :

contained in the international application in written form.

filed together with the international application in computer readable form.

furnished subsequently to this Authority in written form.

furnished subsequently to this Authority in computer readable form.

the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ **Certain claims were found unsearchable** (See Box I).

3. ☐ **Unity of invention is lacking** (see Box II).

4. With regard to the **title**,

the text is approved as submitted by the applicant.

the text has been established by this Authority to read as follows:

WAVEGUIDE POLARISATION ROTATOR.

5. With regard to the **abstract**,

the text is approved as submitted by the applicant.

the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the **drawings** to be published with the abstract is Figure No.

as suggested by the applicant.

because the applicant failed to suggest a figure.

because this figure better characterizes the invention.

1

None of the figures.

A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 H01P1/161 H01P1/165

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 H01P

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category °	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	WO 96 28857 A (CAMBRIDGE INDUSTRIES LIMITED) 19 September 1996 (1996-09-19) page 6, line 17 -page 9, line 2; figures 1,2	1,2,4,5, 7,10

Y	PATENT ABSTRACTS OF JAPAN vol. 14, no. 175, 6 April 1990 (1990-04-06) -& JP 02 029001 A (NEC CORP), 31 January 1990 (1990-01-31) abstract --- -/--	3

Further documents are listed in the continuation of box C.

Patent family members are listed in annex.

° Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family

Date of the actual completion of the international search
